AloD operational governance (Draft)

Community driven
approach for the
AloD platform
governance

Process example: Code Contributor

Operational Governance

Working Groups - suggested structure:

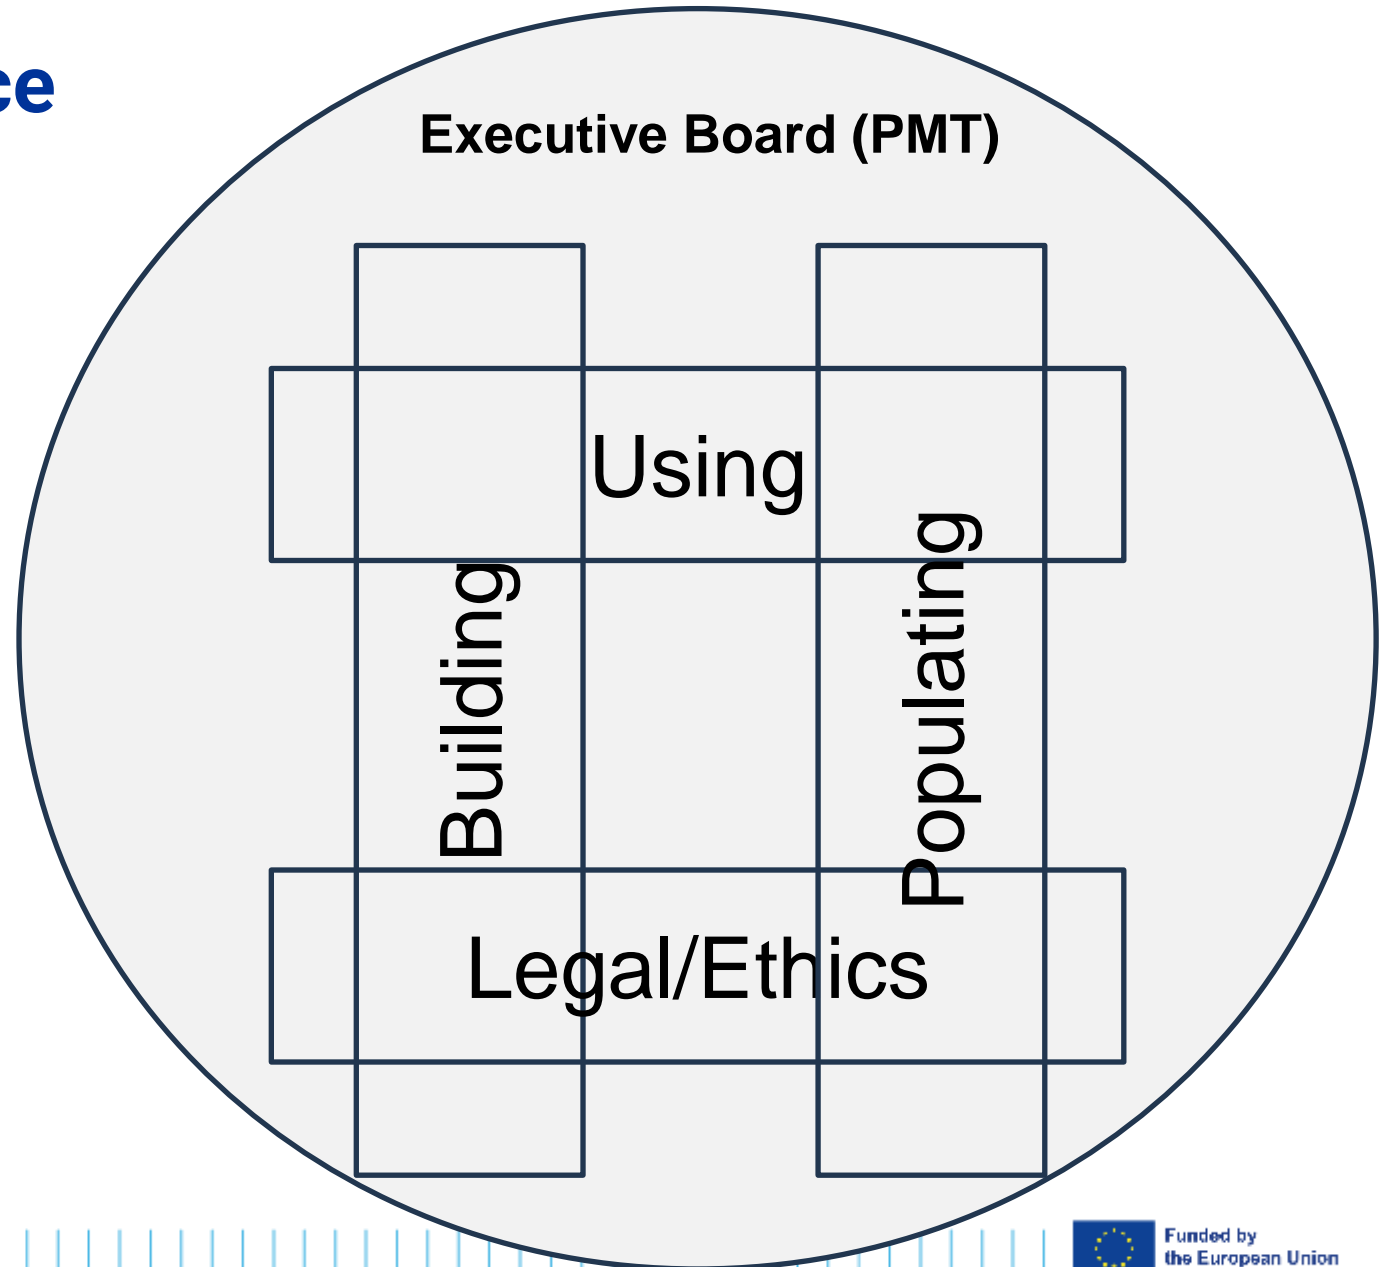

4 working groups:

Vertical

- Building (System)
- Populating (Content)

Horizontal

- Using (community and communication)
- Legal/ethics

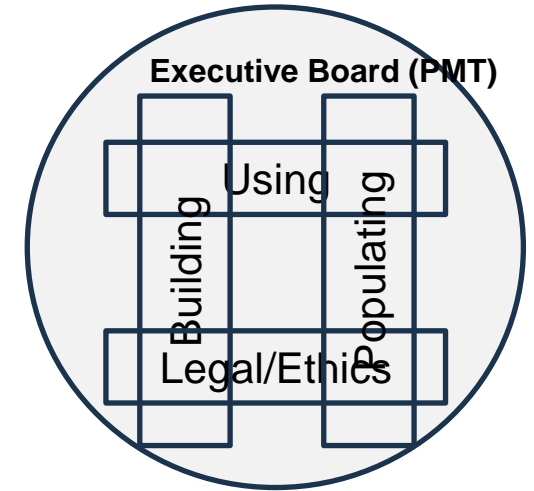

Operational Governance

Working groups (open to community)

Current status:

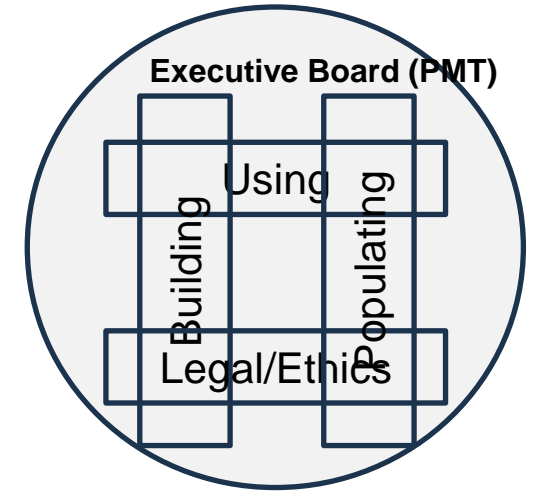

- Scopes defined for WGs “Building” and “Populating”
 - Building:
 - discuss what would be needed in addition to the existing platform
 - discuss what is proposed by the community for extending the platform
 - Populating:
 - upload of content proposed by the community
- Definition of scope for WG “Using”
 - to be finalized in alignment with the Community Engagement Strategy under the leadership of the Community Manager
- WG Legal/Ethics
 - Currently planned to be an internal WG

Operational Governance

Technical Working Groups

- Building:
 - Scope:
 - discuss what would be needed in addition to the existing platform
 - discuss what is proposed by the community for extending the platform
 - Activities (examples):
 - Periodical review on the need for extensions of core services
 - Introducing new core services
 - Decide how a new request is handled
 - Approve pull requests
- Populating:
 - Scope
 - Dealing with all aspects of the upload of content proposed by the community
 - Activities
 - List to be finalized and agreed upon

Operational Governance – next steps

Setup of each working group

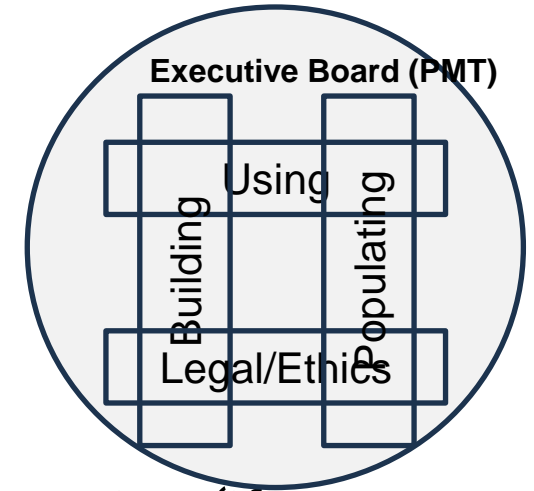

- Definition of members for each working group
- Definition of roles and responsibilities for each working group
- Define decision mechanisms and procedures for community accession (if applicable)

Management of all working groups

- Operational setup for all working groups (tools, web space, etc.)
- Relation to Community manager

Communication strategy (tbd)

- Launch of Social Media campaign promoting the access to the working groups to the community

Any questions?
