What do we want to achieve?

The content submitted by AI4Europe community should also be discoverable via the AIoD API.

This will allow AIoD Applications and Services to leverage this information

AI4Europe - AIoD API | Data synchronization

Step 1) At the AI4Europe portal we are collecting consent by the users

AI4Europe's Privacy Policy has been updated.

There we mention that content submitted in the drupal website will be available under
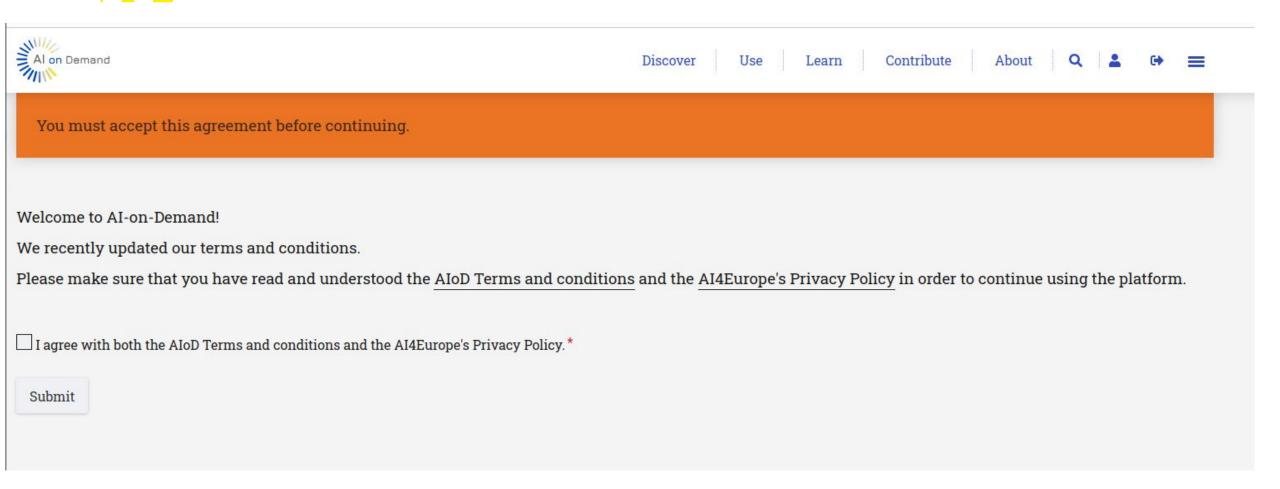

https://api.aiod.eu

Users are asked to accept the new terms and conditions and AI4Europe's Privacy Policy

Step 2) AIoD API retrieves the content via a relevant AI4Europe Connector

The Drupal CMS now exposes an API translating the AI4Europe data schema to the AIoD data

schema. An AIoD connector can take leverage of this API to retrieve the content

AI4Europe | Consent mechanism

AI4Europe to AIoD - Data synchronization

Thank you!
