# Jupyter-Connect: Interactive Exploration

- All Single Models (= not a pipeline) get automatically deployed as Juypter Connect

- The system adds the shared folder and the preconfigured Juypter-Lab

- Everything is setup to send messages from Jupyter to the model and exchange data via shared folder

- model protobuf interface available

- no grpc know-how needed

Web-UI

AI Model

Shared Folder

Jupyter-Connect

- Will work with the playground as well as the vanilla kubernetes deployment (solution.zip)

- Is now available in beta test with the playground

- Release in March 2023

- It is implemented in the context of the Virtual Lab of ICT-48 HumanE-AI-Net
